LIFECHANGING RADIO!

Comments to the FCC, Regarding MB 18-184:

My name is Jonathon Yinger. I own and operate the Christian Broadcasting System, Ltd.

I DO support the FM Class C4/73.125 Proposal to allow eligible Zone II, Class A stations to upgrade in power from 6,000 Watts to 12,000 Watts. It is my position that the band CAN take the upgrades. If the Commission applies the same criteria to the Commercial Band as it does with the Educational Band, then there should be no problem at all. In fact, I've yet to hear any complaints from those in the Education Band about the spacing and interference protections utilized in that band. It is a great working example as to what we should expect.

I believe that the extra power will be a benefit to the public through increased building penetration.

I only own one station that might benefit from this, but I still believe that this is a good idea and would like to see this implemented as soon as possible.

We work hard to properly serve our audience. We do quite a few community events that benefit those in our markets.

Thank you for considering this important issue.

Cordially,

Jonathon Yinger
